Current at the time mothers to the role of motherhood a woman and of the child's identity formation dedicated a lot of numerous studies there is. But of the child its development upbringing and in socialization your father role less studied from problems This is a family matter psychology in the field to the family current and practical important have being is going. In our country family relationship, children upbringing issues special importance is being given. Person's in formation in the family environment, parents and children between relationships important importance occupation is enough family disputes due to row giving cases of families failed to be, nations, states mutually disagreement of young people education is also negative effect from showing proof will give. So yes, father in the family own to their children each bilaterally in behavior, speech manners, words in culture, mutual treatment in the process the most important practical the work in the activity correctness and honesty, sincerity example to be need a child especially son of a bitch children from his father template takes, child education your father position important is counted. Our people in values father of the family breadwinner, material in terms of provider, his considered a keeper if so, today in the day, it is some in families

simple member, customer, consumer that it is spinning our observation can Today's in the day family problems, family upbringing issues of the child's identity in the family development effect more current problem being is going.

Parents motherhood and fatherhood styles in authoritarianism father comparison vour basically of children knowledge ability positive effect to show, mother's authoritarianism while negative the fact that was shown. Your father intellectual features mother's such features compared to more precisely, his gender strict look of the child knowledge abilities to form suitable will come. Children's talent and fatherhood of your profession complexity level in the middle positive compliance determined.

Mamatov, BM. Umarov and of others family also in studies the problem is the husband and wife and the child between relationships and all, your father children in education role family relationships a child education effect studied.

Today's in the day in our country family problems in it of relations socio-psychological aspects about V.Karimova, D.Abdullayeva, F.Akramova, Z.Nishonova, G. Nivozmetova, M. Salaveva. R. Samarov. Z. N.Soginov, Rasulova. Shoumarov and another of our scientists take going studies separately telling our passage it is permissible. CIS countries from scientists field according to VPLevkovich, EIPavlovich VVBoyko, G.M.Breslav, A.G.Volkov, S.V.Kovalev, etc. one series scientists family problems, Olivia in relationships of parents role according to scientific research take those who went This topic foreign some psychologists, in particular, Quinn, Zimbardo, D. Myers of others in his studies light up given Also Russian and French scientists also certain by level studied.

Conclusion

Summary by doing that's it to say maybe in the family father management children in education

very important Family is a person own happiness and happiness, dreams, goals common did, himself a person as perception reached life sura har one a person for family is this of your life the beginning, all of things is the introduction. father and mother each one of the children in his life the dearest and the most important are people. The same at the time our children of his father in his life to his participation friendship, care, protection very need But so what for your father role usually second level is? Sociologists interesting studies spent.

Every ten from a person seven mother and father the child in education equal to responsibility thinks that it loads. But in reality, fathers per year average one from the moon less the time their children with will spend but without a father growing up children much worse their studies already known. From this except, such children crime happen reach probability more After all, everyone one baby perfect to development need it only both of parents in the presence of to be can Mother to child love and love gives, father protection and trust will give. Probably most of you father second mother not your mother place clicker not but father, separately thing that agree you will be.

Father and mother's child to himself typical roles approx. So, our description can Mother, first queue, har how option acceptance does, regret to be and him soothing is a human being. Father you repeatedly try to see inspiring, to yourself trust wake up and to yourself infinite to your regret road not putting, as well as failure reasons to determine help giving man Both are for the child very important Today a child in education your father place about a lot is spoken.

Specialists said son or girl let it be, man's without effect complete person bring up very difficult None who fatherless in education to success reach opportunity denial not enough, but life that's it shows that very less occurs. After all, his child how growth to parents depend Parents are important to him what gives, in particular, his father to him in the world never who give can't get thing to give can Specialists, especially divorce when it comes this not to forget recommendation does Anv male the circumstances father being stay need Psychologists father and mother's to the children relatively educational of their actions to himself typical features each other complement, successful bring up for one different level they claim that it is necessary. German psychologist

Erich Fromm of parents to the children gender approach as follows separated: motherhood the principle is unconditional love principle; mother own their children loves because they are his children Father's love of the child achieved.

Good luck with your achievements behavior depends Current at the time of researchers attention not only" of the family education of the concept of "potential". to the content, perhaps of fatherhood educational potential the problem one series main factors: knowledge and of knowledge combination as to learn directed; of parent's personal qualities; his motives and values system. Many scientists (V.I.Zagvyazinsky, A.D.Chexonin and others) "paternity "male and his child between blood relations, related right and obligations cause emits only if not but education institution (is also understand as norm), they claim that it is possible and both in the family and separately life the child in the circumstances educate organizational structure), parents (father's himself parents as view), pedagogical conscious (self-opportunities in education role and importance to understand with dependent) child) and your father to the child has been active (educational mutually in effect manifestation will be) relationship.
